## CERAMIC GASKETS, CERAMIC FIBERS & CERAMIC ROPES

- ✓ When sealing surfaces in extreme-heat environments, you need something especially powerful. Ceramic gasket needs to be able to protect against temperatures of up to 1,600°C; other times, it is protection against abrasion or chemical attack that is the important quality. We design and create many different types of of gasket to suit a wide variety of important applications.

- ✓ Excellent Thermal Shock Resistance.
- ✓ High Temperature Stability.
- ✓ Low Thermal Conductivity.
- ✓ Low Heat Storage.
- ✓ Light Weight Insulation (easy to handle).
- ✓ Superior Corrosion Resistance.
